# The PDT Difference

Linda Miller started PDT in Missoula, MT in 2000. It is now the second-largest manufacturer of dental instruments in North America and available in 57 countries.

PDT's resin handles are lightweight and wide with exaggerated knurling, which reduces pinch force and hand fatigue and increases tactile sensitivity.

PDT's instruments are made with durable steel and have stronger, harder tips that stay sharp longer and are easily resharpened.

## Proud to Manufacture in Missoula, MT

As you enter our facility in Missoula, MT, you will see a sign that reads: "Beyond these doors, the world's finest dental instrument craftspeople apply their trade."

We love what we do, and we enjoy working with you.

Stay Healthy and Joyful,  
Linda Miller  
PDT CEO/Founder
